

Prerequisites for Publication

Authorship: The Editors of the *Journal of Hepato-Biliary-Pancreatic Sciences* subscribe to recommendations formulated by the International Committee of Medical Journal Editors [<http://www.icmje.org>] regarding criteria for authorship. Accordingly, each person listed as an author or coauthor for a submitted manuscript (does not include Review Articles) must meet *all three* criteria. An author or coauthor shall have:

1. Substantial contributions to the conception or design of the work, or acquisition, analysis or interpretation of data for the work;
2. Drafting the work or revising it critically for important intellectual content;
3. Final approval of the version to be published;
4. Agreement to be accountable for all aspects of the work in ensuring that questions related to the accuracy or integrity of any part of the work are appropriately investigated and resolved.

Meeting these criteria should provide each author with sufficient knowledge of and participation in the work that he or she can accept public responsibility for the report.

Human research: Investigations in humans must be in accordance with the ethical standards of the responsible committee on human experimentation (institutional or regional) or with the Helsinki Declaration of 1964 and all subsequent revisions.

Redundant or duplicate publication*: When submitting a paper, the author must always make a complete statement to the editor about all submissions and previous reports (including meeting presentations and posting of results in registries) that might be regarded as redundant or duplicate publication. The author must alert the editor if the manuscript includes subjects about which the authors have published a previous report or have submitted a related

report to another publication. Any such report must be referred to and referenced in the new paper. Copies of such material should be included with the submitted manuscript to help the editor decide how to handle the matter.

If redundant or duplicate publication is attempted or occurs without such notification, authors should expect editorial action to be taken. At the least, prompt rejection of the submitted manuscript should be expected. If the editor was not aware of the violations and the article has already been published, then a notice of redundant or duplicate publication will probably be published with or without the author's explanation or approval.

Acceptable secondary publication*: Secondary publication in the same or another language, especially in other countries, is justifiable and can be beneficial provided that the following conditions are met.

1. The authors have received approval from the editors of both journals; the editor concerned with secondary publication must have a photocopy, reprint, or manuscript of the primary version.
2. The priority of the primary publication is respected by a publication interval of at least 1 week (unless specifically negotiated otherwise by both editors).
3. The paper for secondary publication is intended for a different group of readers; an abbreviated version could be sufficient.
4. The secondary version faithfully reflects the data and interpretations of the primary version.
5. The footnote on the title page of the secondary version informs readers, peers, and documenting agencies that the paper has been published in whole or in part and states the primary reference. A suitable footnote might read: "This article is based on a study first reported in the [title of journal, with full reference]."

Certification Form – To be submitted with manuscript to Journal of Hepato-Biliary-Pancreatic Sciences

Manuscript title:

All Author's names:
(Full name in print)

I certify that:

1. the author(s) of the above manuscript have all understood and agreed with the conditions in the "Prerequisites for Publication"
2. the manuscript has been prepared according to the "Prerequisites for Publication"

Date:

Corresponding author's signature:

This agreement must be signed by the corresponding author, on behalf of all coauthors of this article, for the manuscript to be published.
