WELCOME

Dear colleagues,

On behalf of the Swiss Pancreas Foundation (www.pankreasstiftung.ch) and the congress organisers we would like to invite you to our biannual World Pancreas Forum, which brings together eminent specialists and leaders in the field of pancreatic pathologies. The World Pancreas Forum is scheduled to take place on 22–23 June 2017 in Bern, Switzerland.

The main topic of the second World Pancreas Forum is the surgical treatment of pancreatitis and pancreatic cancer, with a focus on specialised treatment of disease entities and the corresponding technical aspects, standards, limitations, complications and innovations in surgery. State-of-the-art lectures round off the programme.

In a new interactive format experts battle for their opinions and involve the auditorium. Update symposia in pancreatic oncology and nutrition, live surgery and a distinguished technical exhibition presenting the latest innovations will be other highlights.

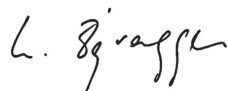

Our aim is to organise an outstanding and exciting clinical and scientific programme with leaders and delegates from all over the world in order to share the very latest findings and knowledge in pancreatic diseases.

We look forward to welcoming you in Bern!

Sincerely yours,

Markus W. Büchler
